

Enterprise Fashion Creator Platform — Master Requirement Planning Document

Product Codename

FASHION OS

1. Executive Vision

Build a premium AI-powered fashion creator ecosystem that combines:

- freelancer marketplace
- fashion workflow management
- portfolio platform
- creator social network
- hiring system
- AI workspace
- production collaboration
- fashion business infrastructure

The platform should feel like:

- Vogue-level luxury
- Linear-level UX
- Apple-level polish
- Pinterest-level visual discovery
- Notion-level productivity
- Dribbble-level portfolio presentation

This is NOT a generic freelance website.

This is:

“The Operating System for the Fashion Industry.”

2. Business Goals

Primary Goals

Goal 1 — Premium Fashion Talent Network

Create the best destination for:

- fashion designers

- tech pack specialists
 - textile designers
 - stylists
 - manufacturers
 - pattern makers
 - creative directors
 - production experts
-

Goal 2 — Fashion Workflow Platform

Allow brands to manage full fashion production workflows.

Goal 3 — AI Fashion Workspace

Use AI to:

- improve productivity
 - reduce beginner friction
 - automate repetitive work
 - improve hiring quality
-

Goal 4 — Creator Economy Platform

Allow creators to:

- grow audience
 - showcase work
 - gain followers
 - monetize expertise
 - build reputation
-

3. User Types

3.1 Freelancer

Capabilities:

- build profile
- upload portfolio
- receive projects
- send proposals
- chat with clients
- manage workflows
- receive payments
- use AI tools

3.2 Fashion Brand

Capabilities:

- post projects
- hire creators
- manage workflows
- collaborate with teams
- track production
- manage approvals

3.3 Manufacturer

Capabilities:

- receive production requests
- manage sample approvals
- submit quotations
- upload manufacturing updates

3.4 Admin

Capabilities:

- moderation
- analytics
- fraud monitoring
- verification
- dispute management
- subscription management

4. Product Architecture

Platform

- └─ Marketing Website
- └─ Authentication
- └─ User Dashboard
- └─ Freelancer Profiles
- └─ Brand Profiles
- └─ Portfolio Engine
- └─ Marketplace
- └─ Messaging
- └─ Workflow System

- └─ AI Tools
- └─ Community Feed
- └─ Learning Hub
- └─ Admin Panel
- └─ Analytics
- └─ Payments

5. Technical Architecture

5.1 Core Architecture Strategy

Use hybrid architecture:

Public Website

Static-first architecture.

Purpose:

- SEO
- ultra-fast loading
- scalability
- edge caching

Pages:

- homepage
- pricing
- blogs
- public portfolios
- category pages
- creator listings
- location pages

Authenticated App

Dynamic React application.

Purpose:

- realtime features
- workflows
- messaging
- dashboards
- AI tools

5.2 Recommended Tech Stack

Area	Technology
Frontend	Astro
UI Framework	React 19
Styling	Tailwind CSS v4
Components	shadcn/ui
Motion	Framer Motion
State	Zustand
Forms	React Hook Form
Validation	Zod
Backend	Firebase
Database	Firestore
Auth	Firebase Auth
Functions	Firebase Functions
Search	Typesense
Analytics	PostHog
Monitoring	Sentry
Payments	Stripe
Emails	Resend
CDN	Cloudflare
Hosting	Vercel

5.3 Infrastructure Principles

Requirements

- mobile-first
- edge optimized
- scalable
- low-cost initially
- component-driven
- modular architecture
- reusable design system

- SEO optimized
 - accessible
-

6. Design System Planning

6.1 Design Direction

Platform aesthetic must feel:

- premium
- luxury
- editorial
- futuristic
- cinematic
- minimal
- high-end SaaS

Avoid:

- cheap gradients
 - cluttered layouts
 - outdated cards
 - generic bootstrap styling
-

6.2 Design Inspirations

Reference inspirations:

- Apple
 - Linear
 - Notion
 - Dribbble
 - Pinterest
 - Vogue
 - Arc Browser
 - Raycast
-

6.3 Layout System

Use:

- Bento layouts
- editorial sections

- asymmetric grids
 - floating panels
 - modular dashboards
 - large whitespace
-

6.4 Typography System

Fonts

Primary

Inter Variable

Editorial

Playfair Display

Monospace

Geist Mono

6.5 Color System

Dark Theme

Background: #0A0A0A
Card: #111111
Border: #1F1F1F
Primary Text: #FFFFFF
Secondary Text: #A1A1AA
Accent Gold: #E8C547

6.6 Component System

Required reusable components:

- Button
- Card
- Input
- Modal
- Drawer
- Sheet

- Tabs
 - Table
 - AI Chat Panel
 - Command Palette
 - Reel Viewer
 - Portfolio Grid
 - Timeline
 - Kanban Board
 - Notification Panel
 - Activity Feed
 - Upload Component
 - Empty States
 - Skeleton Loaders
-

6.7 Motion System

Use:

- Framer Motion
- smooth transitions
- shared layout animations
- opacity fades
- spring interactions

Avoid:

- excessive bounce
 - flashy animation spam
-

7. Landing Website Requirements

7.1 Homepage

Hero Section Requirements

Must include:

- cinematic fashion visuals
- animated headlines
- luxury typography
- CTA buttons
- social proof
- creator showcase
- AI feature highlights

Primary CTA: Hire Elite Fashion Talent

Secondary CTA: Become a Creator

7.2 Sections

Homepage sections:

1. Hero
 2. Trusted By Brands
 3. Featured Creators
 4. AI Features
 5. Workflow Showcase
 6. Creator Success Stories
 7. Marketplace Categories
 8. Community Feed Preview
 9. Pricing
 10. FAQ
 11. Footer
-

7.3 SEO Strategy

Must support:

- static SEO pages
 - structured data
 - metadata optimization
 - OpenGraph images
 - sitemap generation
 - canonical URLs
-

8. Authentication System

8.1 Login Methods

Required:

- Google Login
 - Apple Login
 - Email Login
 - Magic Link Login
-

8.2 User Onboarding

Multi-step onboarding.

Steps: 1. role selection 2. basic info 3. portfolio upload 4. skill selection 5. AI recommendations 6. profile completion

8.3 Security Requirements

Must include:

- rate limiting
 - anti-spam
 - device tracking
 - email verification
 - secure sessions
 - protected routes
-

9. Freelancer Profile Requirements

9.1 Profile Structure

Sections:

- Hero
 - About
 - Skills
 - Portfolio
 - Services
 - Reviews
 - Experience
 - Social Links
 - Availability
 - AI Insights
-

9.2 Portfolio System

Must support:

- images
- reels
- videos

- PDFs
 - moodboards
 - case studies
 - Figma embeds
 - collection galleries
-

9.3 AI Portfolio Analysis

AI checks:

- visual quality
 - missing information
 - professionalism
 - category fit
 - portfolio strength score
 - optimization suggestions
-

10. Marketplace Requirements

10.1 Project Listings

Required fields:

- title
 - category
 - budget
 - timeline
 - description
 - required skills
 - attachments
 - experience level
 - location
-

10.2 Marketplace Filters

Filters:

- category
- budget
- remote
- experience
- country
- urgent

- luxury
 - sustainable fashion
-

10.3 Proposal System

Freelancers can:

- submit proposals
 - attach files
 - create milestones
 - estimate timelines
 - negotiate pricing
-

10.4 AI Proposal Generator

AI generates:

- professional proposals
 - pricing estimates
 - milestones
 - timelines
 - recommendations
-

11. Messaging System

11.1 Core Messaging Features

Required:

- realtime chat
 - typing indicators
 - reactions
 - attachments
 - image previews
 - video previews
 - voice notes
 - read receipts
-

11.2 Collaboration Features

Must support:

- comments
 - task mentions
 - approvals
 - review requests
 - status changes
-

12. Fashion Workflow System

This is the primary platform differentiator.

12.1 Workflow Stages

Concept

- Moodboard
- Sketch
- Tech Pack
- Pattern
- Sampling
- Revision
- Manufacturing
- Production
- Delivery

12.2 Workflow Features

Each stage must support:

- comments
 - approvals
 - uploads
 - status updates
 - due dates
 - AI recommendations
 - revision history
 - task assignments
-

12.3 Workflow Views

Required views:

- Kanban
 - Timeline
 - Calendar
 - Activity Feed
 - File Gallery
-

13. Community Platform

13.1 Feed System

Feed supports:

- reels
 - posts
 - moodboards
 - collections
 - comments
 - saves
 - reposts
 - follows
-

13.2 Creator Discovery

Discovery based on:

- AI recommendations
 - trending creators
 - categories
 - engagement
 - fashion specialties
-

13.3 Social Features

Users can:

- follow creators
- message creators
- save collections

- share projects
 - build audience
-

14. AI System Planning

14.1 AI Features

Required AI systems:

- proposal generator
 - portfolio analysis
 - pricing suggestions
 - creator matching
 - workflow assistant
 - trend suggestions
 - smart search
-

14.2 AI Cost Optimization

Rules:

- avoid unnecessary AI calls
 - cache repeated requests
 - use smaller models when possible
 - use premium models only for high-value actions
-

14.3 AI Model Routing

Task	Recommended Model
Simple Classification	Gemini Flash
Suggestions	GPT-4.1 Mini
Premium Generation	Claude Sonnet
Embeddings	OpenAI Small Embeddings

15. Payment System

15.1 Payment Features

Required:

- milestone payments
 - escrow
 - invoices
 - subscriptions
 - payouts
 - refund system
 - dispute handling
-

15.2 Subscription Plans

Free

- limited profile features
- limited applications

Pro Creator

- AI tools
- analytics
- unlimited portfolio
- profile boosting

Enterprise

- hiring dashboard
 - private talent pools
 - workflow management
-

16. Admin Dashboard

16.1 Admin Features

Required:

- user moderation
- analytics
- fraud monitoring

- reports
 - disputes
 - subscription management
 - verification management
-

16.2 Verification System

Verification methods:

- social verification
 - portfolio verification
 - manual review
 - identity checks
-

17. Performance Requirements

17.1 Performance Targets

Metric	Target
Performance	95+
Accessibility	95+
SEO	100
Best Practices	100

17.2 Optimization Requirements

Must include:

- image optimization
 - route prefetching
 - lazy loading
 - code splitting
 - partial hydration
 - CDN caching
 - font optimization
-

18. Accessibility Requirements

Must support:

- keyboard navigation
 - screen readers
 - reduced motion mode
 - contrast compliance
 - semantic HTML
 - focus states
-

19. Folder Structure

```
/apps
  /web
  /admin
/packages
  /ui
  /design-system
  /config
  /utils
  /types
```

20. Development Standards

Requirements:

- TypeScript strict mode
 - reusable components
 - scalable architecture
 - clean folder structure
 - reusable hooks
 - centralized configs
 - modular services
-

21. Analytics Requirements

Track:

- onboarding funnel
- conversion rates
- creator engagement

- project completion
 - AI usage
 - payment metrics
 - retention
-

22. Future Expansion Planning

Phase 2

- mobile apps
 - AI fashion generation
 - manufacturer network
 - creator subscriptions
 - advanced analytics
-

Phase 3

- enterprise hiring
 - fashion ERP tools
 - sourcing marketplace
 - trend prediction AI
 - B2B manufacturing ecosystem
-

23. Deployment Strategy

Frontend

Use:

- Vercel
 - Cloudflare CDN
-

Backend

Use:

- Firebase
-

Search

Use:

- Typesense
-

Monitoring

Use:

- Sentry
 - PostHog
-

24. Critical Product Principles

Never compromise:

- performance
 - premium UX
 - visual quality
 - trust
 - accessibility
 - responsiveness
 - simplicity
-

25. Final Strategic Direction

The platform must evolve beyond:

- freelance marketplace

Into:

- fashion operating system
- creator economy platform
- AI workspace
- hiring infrastructure
- production collaboration platform
- fashion business ecosystem

Final positioning:

“The modern platform where fashion brands build collections with elite global talent.”
