

Fashion Freelancing

Website Content, SEO, Legal & Content-Marketing Package

fashionfreelancing.com · Prepared 16 July 2026

Part 1 — Page Content & SEO Recommendations

Part 2 — Terms and Conditions of Service

Part 3 — Privacy Policy

Part 4 — SEO Content Brief (10 Topics)

Part 1 — Page Content & SEO

Current copy audited from the live pages; recommendations keep the approved brand voice ("done-for-you", honest, no fake proof) while adding the search terms buyers actually type. Titles ≤ 60 characters where possible; meta descriptions 150–160.

PAGE: Homepage (fashionfreelancing.com)

1. HTML <title>

CURRENT

Our services — hire the Fashion Freelancing team direct

RECOMMENDED

Fashion Freelancing | Tech Packs, 3D Sampling & Fashion Design Services

The current title has no service keywords. Buyers search the service, not "our services".

2. Meta description

RECOMMENDED

One team for every fashion service — tech packs, 3D virtual sampling, pattern making, print design, AI photography, e-commerce listings and websites. Fixed quote in 24 hours.

3. H1

CURRENT

Everything your fashion business needs — under one team.

VERDICT

Keep. Strong positioning line; the title tag carries the keywords so the H1 can carry the brand.

4. Footer description (add site-wide)

Fashion Freelancing is a fashion design and production-services studio. We build factory-ready tech packs, 3D virtual samples, digital patterns, seamless prints, woven designs, AI product photography, marketplace listings, websites and brand design — with a fixed written quote within 24 hours.

5. Footer honesty line (recommended)

Every quote is fixed before work starts. Two revision rounds are included in every package. Full ownership of deliverables transfers to you on final payment.

PAGE: Tech Pack (/pages/services/tech-pack.html)

CURRENT TITLE

Tech Packs That Factories Take Seriously - Fashion Freelancing

RECOMMENDED TITLE

Tech Pack Design Service — Factory-Ready Apparel Tech Packs | Fashion Freelancing

"Tech pack design service" and "apparel tech pack" are the transactional queries; the brand line stays as the H1 on the page.

RECOMMENDED META

Done-for-you apparel tech packs: technical flats, measurement specs, BOM, construction notes and colorways. Send a sketch or reference — fixed quote in 24 hours.

H1 VERDICT

Keep "The document that makes factories take you seriously." — it converts; the title tag now carries the keyword.

PAGE: 3D Virtual Sampling

CURRENT TITLE

3D Virtual Sampling for Fashion Brands & Manufacturers - Fashion Freelancing

VERDICT

Keep — already keyword-correct. Consider adding "CLO3D" to the meta description: buyers who know the software search by its name.

RECOMMENDED META

Production-accurate 3D garment samples in CLO3D and Browzwear — real fabric drape, every colorway, first render in 24 hours. Review in days, not weeks.

PAGE: Seamless Pattern

CURRENT TITLE

Seamless Print & Repeat Pattern Design - Fashion Freelancing

RECOMMENDED TITLE

Seamless Repeat Pattern Design for Textile Printing | Fashion Freelancing

"Textile printing" pulls in the mill-side searches; "repeat pattern design" is the designer-side query. Both belong in the title.

PAGE: Pattern Making CAD

CURRENT TITLE

Digital Pattern Making (CAD) for Fashion Brands - Fashion Freelancing

RECOMMENDED TITLE

Pattern Making Service — CAD Patterns & Grading (Gerber, Lectra, DXF) | Fashion Freelancing

Factories and production managers search by format name. Gerber/Lectra/DXF in the title is a niche unlock nobody else does.

PAGE: Dobby & Jacquard

CURRENT TITLE

Dobby & Jacquard Weave Design for Mills & Brands - Fashion Freelancing

VERDICT

Keep — exact-match for a low-competition niche. Add "loom-ready" to the meta description.

PAGE: Website Development

CURRENT TITLE

Website Design & Development for Any Business - Fashion Freelancing

RECOMMENDED TITLE

Website Design & Development — Fixed Quote in 24h | Fashion Freelancing

"For any business" adds no search value; the 24h quote is the differentiator worth showing in the SERP.

PAGE: AI Agent

CURRENT TITLE

AI Customer Agent for Fashion Brands & Stores - Fashion Freelancing

RECOMMENDED TITLE

AI Customer Support Agent for WhatsApp & Instagram Stores | Fashion Freelancing

Store owners search the channel ("WhatsApp chatbot for business"), not the category ("AI customer agent").

PAGE: AI Photography

CURRENT TITLE

AI Fashion Photography — On-Model Photos from Flat Shots - Fashion Freelancing

VERDICT

Keep — "on-model photos from flat shots" is exactly the long-tail query. Ensure the human-QA promise appears in the meta description; it is the differentiator.

PAGE: E-Commerce Listing

CURRENT TITLE

E-Commerce Listing Creation for Fashion - Fashion Freelancing

RECOMMENDED TITLE

Amazon & Myntra Listing Service for Fashion Brands | Fashion Freelancing

Platform names are the highest-intent tokens in this niche ("Amazon listing service India").

PAGE: Graphic Design

CURRENT TITLE

Graphic Design for Fashion Brands - Fashion Freelancing

RECOMMENDED TITLE

Graphic Design for Fashion Brands — Lookbooks, Tags & Social | Fashion Freelancing

Site-wide SEO actions

- Add an **About page** with the real team — on a services site, anonymous = untrusted (see Part 4, "trust infrastructure").
- Wire the contact forms to a real backend before driving any traffic — leads currently do not reach you.
- Each service page should cross-link its sibling service where the workflows touch (tech pack → 3D sampling → pattern CAD is one production journey).
- Keep JSON-LD Service + FAQPage schema in sync with visible copy when titles change (both live in each page's head script).
- Once real proof assets exist, replace the placeholder proof slots — image results earn fashion-niche clicks.

Part 2 — Terms and Conditions of Service

Effective Date: [date] · Last Updated: [date]

IMPORTANT — PLEASE READ CAREFULLY. These Terms and Conditions ("Terms") are a legally binding agreement between you and Fashion Freelancing. They cover how projects are quoted, delivered and revised, who owns the work, payment, confidentiality, AI-assisted deliverables, limitations of liability, and dispute resolution. By requesting a quote, accepting a quote, or using fashionfreelancing.com (the "Site"), you accept these Terms.

Bracketed placeholders — [Legal Entity Name], [Jurisdiction], [Registered Address] — must be completed and the document reviewed by a qualified lawyer before publication. This draft is a working baseline, not legal advice.

1. Who We Are

Fashion Freelancing ("we", "us", "our") is a fashion design and production-services studio providing tech pack creation, 3D virtual sampling, pattern making (CAD), seamless print design, dobby and jacquard weave design, AI product photography, AI customer agents, e-commerce listing creation, website development, and graphic design (each a "Service", together the "Services"). The Site and Services are operated by [Legal Entity Name], registered in [Jurisdiction], with its principal place of business at [Registered Address].

2. Quotes, Scope and Engagement

- **Fixed written quote.** After you send a brief, we aim to reply with a fixed written quote within 24 hours (business days). The quote states the scope, deliverables, price and delivery date. It is valid for 14 days unless stated otherwise.
- **No work starts without acceptance.** A project begins only when you accept the quote in writing (email is sufficient) and any agreed advance payment is received.
- **Scope changes.** Work outside the quoted scope — a new garment, a new concept, additional deliverables — is quoted separately before we do it. We do not bill surprise extras.

3. Revisions

Every package includes **two structured revision rounds**. A revision round is a consolidated set of change requests against the delivered work within the quoted scope. A new concept, garment, artwork direction or platform is a new brief, not a revision, and is quoted honestly in advance. Additional revision rounds beyond the included two are available and quoted before we start them.

4. Client Materials and Responsibilities

- You confirm you own, or are licensed to use, all materials you send us (sketches, references, logos, photos, measurements, size charts, product data) and that our use of them for your project does not infringe any third-party right.
- Deliverable accuracy depends on input accuracy. Measurements, fabric specifications and platform requirements you provide are relied upon as correct; errors originating in supplied information are corrected as a revision or, where substantial, re-quoted.
- You are responsible for final approval before production use. We strongly recommend appropriate physical checks (for example, a physical proto before bulk production; a strike-off before a full print run).

5. Deliverables, Ownership and Portfolio

- **Ownership transfers to you on final payment.** Upon receipt of full payment, all rights in the commissioned deliverables — including source files where quoted — transfer to you. Until final payment, all work remains our property.
- **Exclusivity.** Commissioned designs (prints, weaves, patterns, tech packs, brand assets) are never resold, re-coloured, or reused for another client.
- **Portfolio.** We do not display client work publicly without your written permission. If you grant it, you may withdraw it at any time for future use.
- **Our pre-existing tools.** Generic techniques, templates, code libraries and know-how we owned before the project remain ours; you receive a perpetual licence to use them as embedded in your deliverables.

6. AI-Assisted Services — Specific Terms

- **AI Photography.** Generated on-model imagery is produced from your product photos, human-checked against the physical garment before delivery. Synthetic models only — no real person's likeness is used without documented consent. Marketplace and advertising platforms may require AI-generated imagery to be disclosed; we advise on current platform rules at delivery, but compliance with a platform's policies at the time of your publication is your responsibility.
- **AI Customer Agent.** The agent answers only from content you approve. You review sample conversations before launch. You remain responsible for the accuracy of policies, prices and product information supplied to the agent, and for legal requirements applying to automated communications in your market.
- **3D Virtual Sampling.** Renders and simulations are design-review tools based on the specifications you provide. They are not a guarantee of physical production outcomes; we recommend a physical proto before bulk.

7. Payment

- Payment terms (including any advance) are stated in each quote. Unless the quote says otherwise, the balance is due on delivery, before source-file handover and ownership transfer.
- Late payments may pause active work and delivery timelines.
- Taxes (including GST where applicable) are charged in addition to the quoted price where required by law.

8. Cancellation and Refunds

- You may cancel a project in writing at any time. Work completed up to the cancellation date is billable proportionally against the quote; any unearned advance beyond that is refunded.
- If we fail to deliver the quoted scope and cannot remedy it within a reasonable cure period, you are entitled to a refund of amounts paid for the undelivered portion.
- Completed and delivered work is non-refundable once approved.

9. Confidentiality

Your briefs, tech packs, unreleased designs, business information and customer data are treated as confidential. We do not share them except with team members working on your project under equivalent obligations. A mutual NDA is available on request and is signed before any sensitive reference files move, where requested.

10. Timelines

Delivery dates are stated in the quote and assume timely receipt of your materials, feedback and approvals. Delays on the client side extend timelines correspondingly. Where a delay originates with us, we will tell you promptly and propose a corrected date.

11. Acceptable Use of the Site

You agree not to misuse the Site: no unlawful use, no attempts to breach security, no scraping beyond a compliant crawler, no submitting false briefs or impersonating others, and no interfering with the Site's operation.

12. Intellectual Property of the Site

The Site — its design, text, graphics, logo and code — is owned by [Legal Entity Name] or its licensors. "Fashion Freelancing" and our logo are our marks; do not use them without written consent.

13. Disclaimers

THE SITE IS PROVIDED "AS IS". Excluding the express commitments in a written quote, and to the fullest extent permitted by law, we disclaim implied warranties including merchantability, fitness for a particular purpose and non-infringement. We do not warrant business outcomes — including sales performance, search rankings, marketplace approval, or production results — of any deliverable.

14. Limitation of Liability

TO THE FULLEST EXTENT PERMITTED BY LAW, WE ARE NOT LIABLE FOR indirect, incidental, special, consequential or punitive damages, or loss of profits, revenue or goodwill. Our total cumulative liability for claims arising out of a project will not exceed the amount you paid us for that project. Nothing in these Terms excludes liability that cannot be excluded by law.

15. Indemnification

You agree to indemnify us against claims arising from materials you supplied, your breach of these Terms, or your use of deliverables in violation of law or third-party rights.

16. Governing Law and Disputes

- These Terms are governed by the laws of [Jurisdiction — e.g., India] .
- **Talk first.** Before any formal claim, contact [legal@ email] with the dispute and desired remedy; both parties get 60 days to resolve it informally.
- Unresolved disputes are subject to the exclusive jurisdiction of the courts of [City, Jurisdiction] , or arbitration under [e.g., the Arbitration and Conciliation Act, 1996] if both parties agree in the quote.

17. General

We may update these Terms with reasonable notice for material changes; continued use after the effective date is acceptance. If a provision is unenforceable, the rest stands. Our failure to enforce a right is not a waiver. You may not assign these Terms without consent; we may assign them in a merger or asset sale on notice. Neither party is liable for delay caused by events beyond reasonable control.

18. Contact

Questions about these Terms: [legal@ email] · Projects and support: hello@fashionos.app · Postal: [Legal Entity Name], [Registered Address]

— End of Terms and Conditions —

Part 3 — Privacy Policy

Effective Date: [date] · Last Updated: [date]

Baseline draft for legal review. Placeholders must be completed before publication. One item requires action, not wording: **the Site's contact forms must submit to a server before this policy publishes** — a privacy policy describing storage that doesn't exist yet, or omitting storage that does, is worse than none.

1. Who We Are

fashionfreelancing.com is operated by [Legal Entity Name], [Registered Address]. For privacy questions contact [privacy@ email].

2. Information We Collect

- **Enquiry details you provide.** When you request a quote we collect your name, email address, company (optional), the service you select, and your project description. That's the core of it — the Site has no accounts.
- **Project materials.** If you engage us, the files you share for the project (sketches, tech packs, product photos, size charts, brand assets) are processed to deliver the work and treated as confidential business information (see Terms, Section 9).
- **Technical data.** Standard server and analytics data: IP address, browser type, pages visited, referring URL, approximate (city-level) location. No precise GPS.
- **Communications.** Emails and messages you exchange with us, retained for the working relationship.

3. How We Use Information

- Reply to your enquiry with a quote (the purpose you gave it to us for);
- Deliver contracted projects and communicate about them;
- Operate, secure and improve the Site;
- Send occasional service updates only if you opt in — never a purchased list, and you can unsubscribe any time;
- Meet legal, tax and accounting obligations.

4. What We Do NOT Do

- We do not sell personal information.
- We do not share your project files, unreleased designs or business information with anyone outside the project team.
- We do not use your commissioned work or confidential materials to advertise to others, or display it publicly without written permission.
- We do not use third-party advertising cookies on the Site.

5. Sharing

We share personal data only with: (a) service providers who host our infrastructure, deliver email, or provide analytics — bound by contract to use it only on our instructions; (b) authorities where a binding legal demand requires it, narrowed to what the demand strictly requires; (c) a successor entity in a merger or asset sale, with prior notice to you.

6. Cookies & Analytics

We use strictly-necessary cookies for Site operation and, where deployed, privacy-respecting analytics to understand aggregate usage. Where law requires consent for non-essential cookies, we ask first. Current tools are listed at [\[/cookies or footer link\]](#).

7. Retention

- Enquiries that don't become projects: deleted or anonymised after [\[12\]](#) months.
- Project files and correspondence: retained for the project and for [\[24\]](#) months after completion for support and warranty, then deleted on request or per schedule.
- Legal/tax records: as long as law requires.

8. Security

Data in transit is encrypted (TLS 1.2+). Access to client files is limited to the people working on your project. No system is perfectly secure; if a breach likely creates risk to you, we will notify you and the relevant authorities as applicable law requires.

9. Your Rights

Depending on your location you may have rights of access, correction, deletion, portability, objection/restriction, and consent withdrawal. Email [\[privacy@ email\]](#) — we respond within 30 days and verify identity before acting.

- **India (DPDPA 2023):** you may contact our Grievance Officer at [\[grievance@ email\]](#) and may nominate another person to exercise your rights in case of death or incapacity.
- **EU/UK (GDPR):** legal bases are contract performance (quotes, projects), legitimate interests (security, improvement), consent (marketing, non-essential cookies) and legal obligation. You may complain to your supervisory authority; we'd appreciate the chance to resolve it first.

10. International Transfers

We work with clients globally; data may be processed in [\[hosting regions\]](#). Where transfer rules apply (EEA/UK), we rely on appropriate safeguards such as Standard Contractual Clauses.

11. Children

The Site is a business service and is not directed to children under 18. We do not knowingly collect children's data.

12. Changes & Contact

Material changes are posted with a new date and, where appropriate, emailed. Questions: [\[privacy@ email\]](#) · [hello@fashionos.app](#) · [\[Legal Entity Name\]](#), [\[Registered Address\]](#) .

— End of Privacy Policy —

Part 4 — SEO Content Brief: The 10

- **These are directional, not final keywords.** Validate each primary target in a keyword tool (with India as location where marked) for real volume and low difficulty before assigning. Kill anything secretly competitive.
- **B2B fashion is long-tail by nature.** Volumes are small but intent is surgical — one ranked article can feed real briefs. Expect months, not weeks.
- **Prioritize by intent, not volume.** A founder about to commission a tech pack is worth more than a thousand students researching fashion careers.
- **The India + factory-language angle is the edge.** US content mills write for hobbyists; almost nobody writes for Indian founders talking to Indian factories in factory vocabulary. That gap is where this site wins.

Priority tiers

- Tier 1 — do first, transactional, feeds a service page: Topics 1, 2, 5, 8
- Tier 2 — winnable informational, India-first: Topics 3, 4, 6, 9
- Tier 3 — support content, lower ceiling: Topics 7, 10

1. "How much does a tech pack cost in India?" — honest cost explainer Tier 1

- **Old head term:** "what is a tech pack" (saturated by US blogs).
- **New target:** cost and commissioning queries — "tech pack cost India", "tech pack designer price", "how much to charge for a tech pack".
- **Intent:** A founder with a design, deciding whether to commission. This is the buyer.
- **Angle:** Honest market ranges and what drives price (garment complexity, size range, colorways) — without publishing our own price list; the CTA is the fixed 24h quote.
- **Feeds:** Tech Pack page.

2. "What does a factory need before they'll quote you?" — checklist Tier 1

- **Target:** "what to send a clothing manufacturer", "how to approach a garment factory India", "minimum order quantity clothing manufacturer India".
- **Intent:** Founder about to email factories — the exact moment they discover they need a tech pack.
- **Angle:** Real factory-side vocabulary (spec sheet, BOM, cutter's must); include the rejection reasons factories actually cite.
- **Feeds:** Tech Pack + Pattern CAD pages.

3. "How to start a clothing brand in India — the production path" Tier 2

- **Old head term:** "how to start a clothing brand" (global, saturated).
- **New target:** India-specific production sequence queries — "clothing brand from scratch India", "sampling to production process".

- **Angle:** The design → tech pack → sample → grading → bulk journey, honestly costed in time, with each step linking its service page. Pillar piece for the internal-link cluster.
- **Feeds:** whole site; the homepage journey.

4. "Gerber vs Lectra vs DXF — which pattern format does your factory use?" Tier 2

- **Target:** "DXF AAMA pattern format", "convert Gerber to Lectra", "pattern file formats apparel".
- **Why winnable:** Tiny competition; searched by production managers with budgets. Nobody else writes this in plain language.
- **Feeds:** Pattern CAD page (its format wall answers the question the article raises).

5. "3D sampling vs physical sampling — cost and time honestly compared" Tier 1

- **Target:** "3D garment sampling cost", "CLO3D sampling service", "reduce sampling costs apparel".
- **Angle:** Honest comparison including when physical sampling still wins (the honesty is the differentiator and matches the page's tone). Anchor facts to published industry results with named sources only in the article context — never as implied client work.
- **Feeds:** 3D Virtual Sampling page (best converter after the interactive model).

6. "Half-drop, tossed or full-drop? Repeat types your printer expects" Tier 2

- **Target:** "half drop repeat pattern", "seamless repeat for fabric printing", "print file requirements textile mill".
- **Angle:** Visual explainer using the same diagrams as the service page; ends on the seam-audit concept.
- **Feeds:** Seamless Pattern page.

7. "Is AI product photography allowed on Amazon and Myntra?" — policy explainer Tier 3

- **Target:** "AI generated product images Amazon policy", "AI model photos Myntra".
- **Caution:** Platform policies change — date-stamp the article, review quarterly, and never claim blanket permission. The honest, updated answer is the moat.
- **Feeds:** AI Photography page.

8. "Amazon listing optimization for clothing — India" Tier 1

- **Target:** "Amazon listing optimization clothing India", "Myntra catalog requirements", "size chart returns reduction".
- **Intent:** Seller with live SKUs and a returns problem — consultation-ready.
- **Angle:** The fit-information → returns connection; attribute completeness as hidden search. The listing-anatomy visual from the service page reused as article graphics.
- **Feeds:** E-Com Listing page (direct conversion).

9. "WhatsApp customer support for boutiques — what to automate and what not to" Tier 2

- **Target:** "WhatsApp business chatbot boutique", "automate Instagram DMs store India".
- **Angle:** Honest triage — the repetitive 80% vs the human 20% (mirrors the service page's framing). The anti-hype tone stands out in an AI-slop category.
- **Feeds:** AI Agent page.

10. "Version9_final_FINAL.psd — the real cost of scattered brand files" Tier 3

- **Target:** "brand style guide small business", "brand consistency social media".
- **Angle:** Story-led, shareable; the system-first argument from the Graphic Design page expanded with a template checklist lead magnet.
- **Feeds:** Graphic Design page + email capture.

Two structural moves that matter more than any single article

1. **Fix the pipe before pouring water.** The contact forms currently store leads in the visitor's own browser (localStorage) — no article should be published before form submissions actually reach you. This is the single highest-ROI task on the site.
2. **Publish the trust infrastructure first or in parallel:** a real About page with the actual team, the Terms and Privacy pages (Parts 2–3 of this document, lawyer-reviewed), and 2–3 real studio proof samples to replace placeholder slots. On a B2B services site this is the ceiling on everything above.

Validation checklist before you assign

- [] Run each primary target through a keyword tool (India location for marked topics); confirm real volume + low difficulty.
- [] Drop or re-cut anything that comes back competitive.
- [] Make sure every Tier 1 piece links to its service page and the quote form.
- [] Don't publish Topic 7 without a policy-review date on the page.
- [] Don't publish anything until the contact form backend is live.

— End of package —
